Local Development Plan 2030

RNIA Addendum

Executive Summary

This document comprises a further Addendum to the Draft Plan Strategy Rural Need Impact Assessment (RNIA) Oct 2018 and the addendum dated 2020. These had been prepared as part of the plan documents for Fermanagh and Omagh District Council's Local Development Plan (LDP) 2015 -2030.

The Department for Infrastructure appointed the Planning Appeals Commission to conduct an Independent Examination (IE) of the Fermanagh & Omagh District Council Local Development Plan Strategy. The draft Plan Strategy was subject to Independent Examination by Planning Appeals Commission from 18th January – 23rd March 2022. During those hearing sessions a number of additional proposed changes were put forward by the Council. The PAC concluded that, subject to modifications, the draft Plan Strategy met the tests of soundness as required.

In January 2023, the Department for Infrastructure issued a Direction to the Council to adopt the Plan Strategy with modifications. The Department's Direction included two schedules. The first Schedule contains Recommended Amendments which reflect the Council's proposed changes (October 2020). The Council has already screened these proposed changes in the RNIA Appraisal Addendum FODC114.

The second schedule in the Direction included for screening purposes below as Table 1 are those modifications which DfI have directed as being necessary for the adoption of the Plan Strategy. It should be noted of the 50 proposed modifications directed by DfI, many of these consist of minor edits to Proposed Changes previously suggested by Fermanagh & Omagh District Council. Therefore, this further RNIA addendum should be read in conjunction with the RNIA FODC105 and the RNIA Appraisal Addendum FODC114.

This report assesses the modifications as presented in the Direction from the Department for Infrastructure. There are a number of policies that are to be deleted from the Plan Strategy which will result in the renumbering of some policies within the Plan Strategy, the renumbering has not been reflected in this assessment which assesses the modifications as presented in the Direction.

This report assesses the modification through the RNIA process comprising:

- Screening all the modifications to policies to identify whether there are any changes to the original screening processes; and
- if necessary, to undertake an assessment of the changes that have not been screened out.

The findings are set out in this document in Table 1.

Consultation

The Council undertook a public consultation exercise to afford interested parties an opportunity to comment on the assessment outcomes. The suite of documents subject to the consultation exercise included: the Equality Impact Assessment (further Addendum), the draft Habitats Regulation Assessment (HRA), the Sustainability Appraisal Report (Further Addendum) and the Rural Needs Impact Assessment Report (Further Addendum).

The consultation period ran from 03rd February – 02nd March 2023. Notification was presented in the Belfast Gazette and local papers as well as on the FODC website. Details were included informing the public how to make representation and where to do so.

Consultation summary

A total of 18 representations were received in response to the consultation exercise. A number of responses related directly to the assessments presented, none of which expressed objection to the scoring or findings of any of the Council's assessments.

The remaining representations related to requests to have correspondence details updated, consultees having no infrastructure in the district or members of the public enquiring about having land included within settlement limits (local policies plan stage).

Two further representations were received after the consultation period ended, no issues were raised in relation to the RNIA.

1. Introduction

- 1.1 The modifications to policies and related policy clarification require consideration in order to check if they alter the outcome of the screening process in the published RNIA Report. In particular, the screening process is to identify if any of the changes to policies are likely to have a negative impact on rural needs.
- 1.2 This document forms a further Addendum to the October 2020 RNIA and identifies whether the outcomes of that report should be varied from those originally reported as a result of the Direction. As such, this addendum should be read in conjunction with the RNIA and RNIA Addendum which accompanied the published Draft Plan Strategy.
- 1.3 This Addendum includes the following:
 - Screening of all the Proposed Changes and modifications as set out in the Planning Appeals Commission Independent Examination report to see if they ‘materially’ change the conclusions of the RNIA; and
 - Conclusions to clarify why an updated RNIA is not required.

2. Statutory Requirements

- 2.1 The Rural Needs Act 2016 came into operation on 1 June 2017 and requires district councils and other public authorities to have due regard to rural needs when developing, adopting, implementing or revising policies, strategies and plans, and when designing and delivering public services. The principles of rural proofing are incorporated in the RNIA process.
- 2.2 The purpose of the Act is to ensure that public authorities have due regard to the social and economic needs (i.e. rural needs) of people in rural areas when carrying out certain activities and to provide a mechanism for ensuring transparency in relation to how public authorities consider rural needs when undertaking these activities.
- 2.3 Most strategies and policies developed and implemented across government have a rural dimension and it is recognised that they can have a different impact in rural areas than urban areas due to issues relating to, for example, geographical isolation and lower population densities. It is recognised that as a result of rural circumstances people in rural areas may have different needs and therefore a policy or public service that works well in urban areas may not be as effective in rural areas.

3. Screening of the Modifications

3.1 The Modifications have been screened to identify whether there were any changes to the assumptions made regarding rural impact and the assessment of how individual policies have been influenced by rural needs which would change the final outcome of the RNIA. Each of the Modifications to the policies were compared against the original RNIA in terms of the aim of the policy, the rural impact and influence of rural needs on the policy.

4 Conclusions

- 4.1 The Modifications do not introduce any new policies, rather they represent logical and rational amendments to ensure coherence and consistency.
- 4.2 The aims and influence of the policies are unaltered either by or due to the modifications; nor is the overall 'Vision' for the District as set out in the PS, affected. In reassessing the Rural Needs Impact of the amended policy, the outcomes are unchanged from that originally identified and considered.
- 4.3 In reassessing the amended policies against the RNIA screening process, the outcomes are unchanged from that originally identified and considered. The conclusions therefore remain unchanged from the original RNIA in that it is anticipated that the Plan Strategy will have no adverse impact with regards to rural needs either directly or indirectly. Consequently, the modifications do not affect the Plan Strategy Rural Impact any differently than previously identified and considered.
