

## Fabulous bird feeder

Get creative with an old carton and feed the birds

### You will need:

- A clean, dry carton
- Two twigs
- Scissors
- String or strong garden twine
- Bird seed

1

Cut a large hole in each side of the carton – this is where the birds will feed.

2

Make a small hole on each side and thread the twigs through to make perches.

3

Make tiny holes in the base so rainwater can drain out (don't make them too big or the seeds will fall through!).

4

Pour bird seed into the carton – but only up to the holes the birds will eat from.

5

Punch two holes in the top of the carton, thread the string or twine through and hang it up.

6

Remember to keep the seed topped up and replace the feeder when it starts to get dirty.

**Carry on feeding the birds once you start; they rely on it and go hungry without it.**

Feel free to copy and share this for personal and educational use – and don't forget there are loads more brilliant activities to download on our website!
